# **COSMIC FIREWORKS**

Do you often observe the night sky? If yes, chances are, you would have seen brilliant streaks of light called shooting stars. Did you make a wish upon them? You must be curious about what are they? Where do they come from and what are they made off?. Welcome to the world of meteoroids, meteors and meteorites. Think like an astronomer, gather your tools and start the Meteorite Hunt!

# CHALLENGE

Q1 Name the following places where meteoroids originate.

1. Solar System

2. Moon

3. Asteroid

4. Comet

Q2 In which countries do the biggest meteorite craters shown below fall:
