

## Walking on the Moon

(APRIL 12, 2019 – Time to be confirmed)

The moon will seem close enough to touch during [The Virtual Telescope Project's](#) remote, online lunar observing session. Take a tour of the moon with friends around the planet!

Join Gianluca Masi, PhD of the Virtual Telescope project and Astro-Artist Bettina Forget as they present a tour of the various craters on our closest neighbor, the Moon. Bettina will be conducting a Sketching the Moon workshop on 28 April, 2019 at 1500 UT as a follow-up to this very special program.

Join in to find your own crater, mountain or sea while flying over our ancient satellite, with live narration. We promise you an unforgettable event. To watch this event is easy, simply head to the Virtual Telescope's [WebTV](#)

Share your contribution and experience with us and the world on various social media platforms using various hashtags.
